RESEARCH PROGRAM

Quaternary geology, isotope geochemistry, and geochronology applied to abrupt hydroclimate change, ice-sheet and glacier chronologies, and Earth-surface processes. Active field programs in the United States are in the Great Basin, Grand Canyon, Olympic Peninsula, and Long Island.

Co-PI of Stony Brook's isotope geochemistry facility (FIRST Lab): Nu Plasma 3 MC-ICP-MS, Agilent 8900 triple-quadrupole ICP-MS, IsotopX Phoenix TIMS. Select methods: U-Th and U-Pb geochronology, boron isotopes ($\delta^{11}B$).
